ABOUT US

Who Are We?
BIM AEC Solutions is a premier, multidisciplinary engineering and digital consultancy based in Cambodia, delivering international-standard structural engineering and advanced Building Information Modeling (BIM) management across Southeast Asia and Europe. Led by licensed professional engineers and certified digital construction specialists, we bridge the gap between rigorous structural analysis and cutting-edge virtual design. Our team brings extensive cross-border experience in high-rise towers, complex transfer systems, and landmark commercial developments, providing clients with verified, constructible, and economically optimized engineering solutions.

Our Mission
Our mission is to empower developers, consultants, and contractors to build safer, more efficient, and structurally resilient developments through seamless engineering precision and digital innovation.

We are committed to:

Engineering Integrity
Adhering strictly to international design codes and peer-review benchmarks to ensure structural performance and lifecycle safety.

Digital Integration
Driving full multidisciplinary BIM workflows (LOD 200–500) to eliminate on-site clashes, minimize waste, and accelerate delivery schedules.

Client Value
Optimizing material efficiency through advanced finite element modeling and value engineering without compromising architectural vision or safety.

What We Do?

High-Rise Structural Design & Analysis
Delivering end-to-end reinforced concrete, post-tensioned systems, and complex transfer plate analysis for tall buildings, mixed-use towers, and institutional projects.

Advanced BIM Management & Execution
Full-cycle Autodesk Revit modeling, parametric design, BIM Execution Planning (BEP), and virtual construction models tailored for multidisciplinary coordination.

MEP & Spatial Clash Coordination
Integrating structural, mechanical, electrical, and plumbing trades into a unified digital environment to resolve constructability conflicts prior to site mobilization.

Peer Review & Accredited Checking
Independent third-party verification, finite element stress analysis, and structural audits to ensure code compliance, buildability, and optimized material usage.

Costing, Planning & Project Management
Designing bored pile systems, heavy pile caps, deep basements, and retaining structures tailored to complex geotechnical soil-structure interactions.

Detailed Drawings & Construction Documentation
Producing precision structural detailed drawings, rebar schedules, post-tensioning layouts, and constructible documentation packages that streamline field delivery and minimize site errors.

OUR MANAGEMENT TEAM

MENGLIM PHOY
Founder | Managing Director
10+ international experience in High-rise Structural Engineer + Integrated BIM across Russia, Singapore, and Cambodia
PE (SE), ASEAN Eng., ACPE (SE)

Mr. VICTOR KULISHOV
Project Manager
Municipal Deputy of the region in the Russian Federation
13+ experience of enterprise leadership in engineering design and construction

Mr. KONSTANTIN DOBINDA
BIM Manager
17+ experience in international development in digital construction across Russia, Finland, and Sweden

1. ARCHITECTS
2. STRUCTURAL ENGINEERS
3. MECHANICAL ENGINEERS
4. ELECTRICAL ENGINEERS
5. PLUMBING ENGINEERS
6. GEO TECHNICALCENGINEERS
7. QS & PLANNING ENGINEERS
8. DRAFTING ENGINEERS
9. BIM ENGINEERS

OUR SERVICES

Design Consultancy

Established in 2016, BIM A.E.C is an engineering consultancy and digital delivery practice specializing in high-rise building design and multi-disciplinary Building Information Modeling (BIM). Backed by project delivery experience spanning Cambodia, Singapore, and Russia, we integrate structural, architectural, and MEP disciplines into data-rich, constructible virtual models.

Design Review

BIM A.E.C operates under full regulatory accreditation, holding a Design Certificate from the Ministry of Land Management, Urban Planning and Construction, a Professional Engineer (PE) license from the Board of Engineers Cambodia (BEC), and ASEAN Chartered Professional Engineer (ACPE) credentials registered under the ASEAN MRA framework.

CAD & Revit Detailing

BIM & Technical Drafting Solutions We bridge the gap between conceptual structural engineering and construction-ready documentation. By converting complex design intent into intelligent 3D BIM models and coordinated 2D shop drawings, BIM A.E.C delivers constructible, clash-free solutions that streamline multidisciplinary coordination and reduce costly site reworks.

Building Information Modeling

BIM A.E.C delivers precise pre-construction solutions through the creation and management of intelligent 3D models, optimizing the design, construction, and operation of complex facilities.

Costing and Planning

BIM A.E.C provides accurate cost estimation and project budget planning. Beyond standard quantity surveying, we develop comprehensive project timelines and milestone delivery schedules to ensure seamless construction execution.

Construction Supervision

BIM AEC provides certified independent engineering supervision throughout construction—conducting rigorous method statement reviews, structural quality control, and formal endorsements of embedment and installation designs.
